	Mocha	4 years	★★★★★
	JSHint	2 years	★★★★★

## Experience

### 2014 - Present time, Node.js Developer

**Freelancer (Odesk/Upwork)** <http://upwork.com/>

More than year I used to work remotely for MarketWave. (<http://www.market-wave.com/>) MarketWave is company who provide customer multi-channels management (Phone, Live Chat, etc). Company provide sales support for visitors with key leaders of e-commerce. They was my general clients.

#### Primary Responsibilities:

- Design, develop, test and deploy web applications
- Develop appropriate code structures to solve specific tasks according to standards
- Fix bugs, troubleshoot and resolve problems
- Build flexible data models and seamless integration points
- Comment code and write documentation using ApiDoc
- Code review

#### Used technologies and tools:

- Platforms: Node.js
- Frameworks: Express, Angular, Bootstrap
- Databases: MS SQL, Couchbase, Elasticsearch
- Documentation: ApiDoc
- QA: Mocha, JSHint
- Another tools: Less, Jade, Grunt, Bower, NPM

### 2012 - 2014, Team Leader / Project Manager

**QCoders** <http://qcoders.com/>

During work in this company I had only one general project which was divided to few small subprojects. InTouch <http://intouch.inweb24.us/> InTouch is a email marketing system. Like MailChimp or Mandrill but with an emphasis in network marketing. I'm started this project from scratch. Gradually our team has grown up to 7 developers. It was first experience with Node.js on commercial project.

#### Primary Responsibilities:

- Project management
- Team management (team of seven members)
- Estimating and resource planning
- Design and development of system architecture
- Design and development of source code
- Database design and development
- GUI design
- Code review

#### Used technologies and tools:

- Platforms: Node.js
- Frameworks: Express, Backbone, Bootstrap
- Databases: MongoDB
- Documentation: RAML
- QA: Mocha
- Another tools: Less, Jade, Grunt, Bower, NPM

## **2011 - 2012, Senior Software Developer / Team Leader**

**Quadecco** <http://quadecco.de/>

Development of many projects for outsourcing company using following technologies

### Primary Responsibilities:

- Team management
- Estimating and resource planning
- Design and development of system architecture
- Design and development of source code
- Database design and development
- GUI design
- Code review

### Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS
- Frameworks: Yii, Zend Framework, jQuery, Mootools
- Databases: MySQL, MSSQL

## **2009 - 2011, Senior Software Developer / Team Leader**

**ZFort Group** <http://www.zfort.com.ua/>

Development of many projects for outsourcing company using following technologies

### Primary Responsibilities:

- Team management
- Estimating and resource planning
- Design and development of system architecture
- Design and development of source code
- Database design and development
- GUI design
- Code review

### Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS
- Frameworks: Yii, PRADO, Zend Framework, jQuery
- Databases: MySQL

## **2007 - 2009, Software Developer**

**Intetics Co** <http://intetics.com/>

Development of many projects for outsourcing company using following technologies

### Primary Responsibilities:

- Code development
- Database development

### Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS
- Frameworks: jQuery
- Databases: MySQL

## **2005 - 2006, Junior Software Developer**

**Letwork** <http://www.letwork.com/>

Development of many projects for outsourcing company using following technologies

### Primary Responsibilities:

- Code development
- Database development

### Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS
- Databases: MySQL
