## Senior Node.js Developer

### Contact

 +380 98 9309333  
 anton.zarubin@gmail.com  
 anton\_zarubin

### Social

 github.com/zarant77  
 npmjs.com/~zarant77

### Programming Language

JavaScript  
12 years

CSS  
12 years

C++  
2 years (non-commercial usage)

HTML  
12 years

PHP  
10 years

Java  
1 year

### NoSQL DBMS

MongoDB  
1 year

Couchbase  
2 years

### Skills Summary

#### OS/Platform

About ten years experience in PHP development.

Windows  
18 years

Linux  
12 years

FreeBSD  
12 years

Good attention to details.

Native languages - Russian and Ukrainian. Conversational English.

Elasticsearch  
2 years

Redis  
4 years

## Relational DBMS

MS SQL  
3 years

MySQL  
12 years

PostgreSQL  
1 year

## ORM

Sequelize  
3 years

Mongoose  
1 year

## Tools/Frameworks

Node.js  
4 years

Express  
4 years

HAPI  
Less than a year

jQuery  
7 years

Angular  
1 year

Backbone  
Less than a year

React  
Less than a year

NW.js  
Less than a year

PhoneGap  
Less than a year

Cordova  
Less than a year

Jade  
4 years

LESS  
4 years

SASS  
Less than a year

Bootstrap  
4 years

Material-UI  
12 years

## Team Collaboration Tools

Git  
5 years

Subversion  
5 years

 JIRA  
2 years

 Redmine  
1 year

 Target Process  
1 year

## Network Technologies

REST HTTP(S) REST  
5 years

 OAuth  
1 year

 WebSockets  
1 year

## Other Tools

 Gulp  
1 year

 Grunt  
4 years

 NPM  
4 years

 Bower  
4 years

**API  
DOC** ApiDoc  
2 years

 RAML  
1 year

 Swagger  
1 year

 Mocha  
4 years

 JSHint  
2 years

## Experience

**upwork**<sup>TM</sup>  
formerly oDesk

2014 - Present time, Node.js Developer

Freelancer (Odesk/Upwork) <http://upwork.com/>

More than year I used to work remotely for MarketWave. (<http://www.market-wave.com/>) Managing team and client communication (Phone, Live Chat, etc). Company provide sales support for visitors with key lead generation.

Primary Responsibilities:

Design, develop, test and deploy web applications

- Develop appropriate code structures to solve specific tasks according to standards
- Fix bugs, troubleshoot and resolve problems
- Build flexible data models and seamless integration points
- Comment code and write documentation using ApiDoc
- Code review

Used technologies and tools:

- Platforms: Node.js
- Frameworks: Express, Angular, Bootstrap
- Databases: MS SQL, Couchbase, Elasticsearch
- Documentation: ApiDoc
- QA: Mocha, JSHint
- Another tools: Less, Jade, Grunt, Bower, NPM

**2012 - 2014, Team Leader / Project Manager**

**Qcoders** <http://qcoders.com/>

During work in this company I had only one general project which was divided to few small sub-projects like an email marketing system. Like MailChimp or Mandrill but with an emphasis in network marketing. The project has grown up to 7 developers. It was first experience with Node.js on commercial project.

Primary Responsibilities:

- Project management
- Team management (team of seven members)
- Estimating and resource planning
- Design and development of system architecture
- Design and development of source code
- Database design and development
- GUI design
- Code review

Used technologies and tools:

- Platforms: Node.js
- Frameworks: Express, Backbone, Bootstrap
- Databases: MongoDB
- Documentation: RAML
- QA: Mocha
- Another tools: Less, Jade, Grunt, Bower, NPM

**2011 - 2012, Senior Software Developer / Team Leader**

**Quadecco** <http://quadecco.de/>

Development of many projects for outsourcing company using following technologies

Primary Responsibilities:

- Team management
- Estimating and resource planning
