FreeBSD
2 years

Programming Language

JavaScript
12 years *(since 2004)*

HTML
12 years *(since 2004)*

CSS
12 years *(since 2004)*

PHP
10 years

C++
2 years

Java
1 year

NoSQL DBMS

MongoDB
1 year

Couchbase
2 years

Elasticsearch
2 years

Redis
4 years *(since 2012)*

Relational DBMS

MS SQL
3 years

MySQL
12 years (since 2004)

PostgreSQL
1 year

ORM

Sequelize
3 years (since 2013)

Mongoose
1 year

Team Collaboration Tools

Git
5 years

Subversion
5 years

JIRA
2 years

Redmine
1 year

Target Process
1 year

Network Technologies

REST

HTTP(S) REST
5 years (since 2011)

OAuth (1, 2)
1 year

WebSockets
1 year

	Grunt 4 years (since 2012)	★★★★★
	NPM 4 years (since 2012)	★★★★★
	Bower 4 years (since 2012)	★★★★★
	ApiDoc 2 years (since 2014)	★★★★★
	RAML 1 year	★★★★☆
	Swagger 1 year	★★★★☆
	Mocha 4 years (since 2012)	★★★★★
	JSHint 2 years (since 2014)	★★★★★

Experience

2014 - Present time, Node.js Developer

Freelancer (Odesk/Upwork) <http://upwork.com/>

More than year I used to work remotely for MarketWave. (<http://www.market-wave.com/>) MarketWave is company who provide customer multi-channels management (Phone, Live Chat, etc). Company provide sales support for visitors with key leaders of e-commerce. They was my general clients.

Primary Responsibilities:

- Design, develop, test and deploy web applications
- Develop appropriate code structures to solve specific tasks according to standards
- Fix bugs, troubleshoot and resolve problems
- Build flexible data models and seamless integration points
- Comment code and write documentation using ApiDoc
- Code review

Used technologies and tools:

- Platforms: Node.js
- Frameworks: Express, Angular, Bootstrap
- Databases: MS SQL, Couchbase, Elasticsearch
- Documentation: ApiDoc
- QA: Mocha, JSHint
- Another tools: Less, Jade, Grunt, Bower, NPM

2012 - 2014, Team Leader / Project Manager

QCoders <http://qcoders.com/>

During work in this company I had only one general project which was divided to few small subprojects. InTouch <http://intouch.inweb24.us/> InTouch is a email marketing system. Like MailChimp or Mandrill but with an emphasis in network marketing. I'm started this project from scratch. Gradually our team has grown up to 7 developers. It was first experience with Node.js on commercial project.

Primary Responsibilities:

- Project management
- Team management (team of seven members)
- Estimating and resource planning
- Design and development of system architecture
- Design and development of source code
- Database design and development
- GUI design
- Code review

Used technologies and tools:

- Platforms: Node.js
- Frameworks: Express, Backbone, Bootstrap
- Databases: MongoDB
- Documentation: RAML
- QA: Mocha
- Another tools: Less, Jade, Grunt, Bower, NPM

2011 - 2012, Senior Software Developer / Team Leader

Quadecco <http://quadecco.de/>

Development of many projects for outsourcing company using following technologies

Primary Responsibilities:

- Team management
- Estimating and resource planning
- Design and development of system architecture
- Design and development of source code
- Database design and development
- GUI design
- Code review

Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS
- Frameworks: Yii, Zend Framework, jQuery, Mootools
- Databases: MySQL, MSSQL

2009 - 2011, Senior Software Developer / Team Leader

ZFort Group <http://www.zfort.com.ua/>

Development of many projects for outsourcing company using following technologies

Primary Responsibilities:

- Team management
- Estimating and resource planning
- Design and development of system architecture
- Design and development of source code
- Database design and development
- GUI design
- Code review

Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS
- Frameworks: Yii, PRADO, Zend Framework, jQuery
- Databases: MySQL

2007 - 2009, Software Developer

Intetics Co <http://intetics.com/>

Development of many projects for outsourcing company using following technologies

Primary Responsibilities:

- Code development

- Database development

Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS

- Frameworks: jQuery

- Databases: MySQL

2005 - 2006, Junior Software Developer

Letwork <http://www.letwork.com/>

Development of many projects for outsourcing company using following technologies

Primary Responsibilities:

- Code development

- Database development

Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS

- Databases: MySQL
