Windows

10+ years (since 1998)

Linux

10+ years (since 2004)

FreeBSD

2 years

MacOS

Less than a year

Programming Language

JavaScript

10+ years (since 2004)

HTML

10+ years (since 2004)

CSS

10+ years (since 2004)

PHP

10+ years (since 2004)

C++

2 years

Java

More than a year

NoSQL DBMS

	MongoDB <i>More than a year</i>	
	Couchbase <i>2 years</i>	
	Elasticsearch <i>2 years</i>	
	Redis <i>4 years (since 2013)</i>	

Relational DBMS

	MS SQL <i>3 years</i>	
	MySQL <i>10+ years (since 2004)</i>	
	PostgreSQL <i>More than a year</i>	

ORM

	Sequelize <i>4 years (since 2013)</i>	
	Mongoose <i>More than a year</i>	

Team Collaboration Tools

	Git <i>5 years</i>	
	Subversion <i>5 years</i>	
	JIRA <i>2 years</i>	
	Redmine <i>More than a year</i>	
	Target Process <i>More than a year</i>	

Tools/Frameworks

	Node.js <i>4 years (since 2013)</i>	
	Express.js <i>4 years (since 2013)</i>	
	HAPI <i>Less than a year</i>	
	jQuery <i>8 years (since 2009)</i>	
	Angular <i>2 years</i>	
	Backbone <i>Less than a year</i>	
	React <i>More than a year (since 2016)</i>	
	Redux <i>More than a year (since 2016)</i>	
	NW.js <i>Less than a year</i>	
	PhoneGap <i>Less than a year</i>	
	Cordova <i>Less than a year</i>	
	Jade (Pug) <i>4 years (since 2013)</i>	
	LESS <i>4 years (since 2013)</i>	
	SASS <i>2 years (since 2015)</i>	
	Bootstrap <i>4 years (since 2013)</i>	
	Material-UI <i>More than a year (since 2016)</i>	

Network Technologies

REST	HTTP(S) REST <i>5 years (since 2012)</i>	
	OAuth (1, 2) <i>More than a year</i>	
	WebSockets <i>More than a year</i>	

Other Tools

	NPM <i>4 years (since 2013)</i>	
	Bower <i>4 years (since 2013)</i>	
	Gulp <i>2 years (since 2015)</i>	
	Grunt <i>2 years</i>	
	Webpack <i>Less than a year</i>	
API DOC	ApiDoc <i>3 years (since 2014)</i>	
RAML	RAML <i>More than a year</i>	
	Swagger <i>More than a year</i>	
	JSHint <i>2 years</i>	
	ESLint <i>More than a year</i>	
	Mocha <i>4 years (since 2013)</i>	

Experience

2016 - 2017, Frontend Developer

Match2One <https://www.match2one.com/>

Match2One had all first-hand seen the fragmented programmatic landscape and all the challenges that small and medium advertiser are facing. Match2One democratize technology for businesses by creating innovative products that empower customers to grow.

- Documentation: ApiDoc
- QA: Mocha, JSHint
- Another tools: Less, Jade, Grunt, Bower, NPM

2012 - 2014, Team Leader / Project Manager

QCoders <http://qcoders.com/>

During work in this company I had only one general project which was divided to few small subprojects. InTouch <http://intouch.inweb24.us/> InTouch is a email marketing system. Like MailChimp or Mandrill but with an emphasis in network marketing. I'm started this project from scratch. Gradually our team has grown up to 7 developers. It was first experience with Node.js on commercial project.

Primary Responsibilities:

- Project management
- Team management (team of seven members)
- Estimating and resource planning
- Design and development of system architecture
- Design and development of source code
- Database design and development
- GUI design
- Code review

Used technologies and tools:

- Platforms: Node.js
- Frameworks: Express, Backbone, Bootstrap
- Databases: MongoDB
- Documentation: RAML
- QA: Mocha
- Another tools: Less, Jade, Grunt, Bower, NPM

2011 - 2012, Senior Software Developer / Team Leader

Quadecco *<http://quadecco.de/>*

Development of many projects for outsourcing company using following technologies

Primary Responsibilities:

- Team management
- Estimating and resource planning
- Design and development of system architecture
- Design and development of source code
- Database design and development
- GUI design
- Code review

Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS
- Frameworks: Yii, Zend Framework, jQuery, Mootools
- Databases: MySQL, MSSQL

2009 - 2011, Senior Software Developer / Team Leader

ZFort Group <http://www.zfort.com.ua/>

Development of many projects for outsourcing company using following technologies

Primary Responsibilities:

- Team management
- Estimating and resource planning
- Design and development of system architecture
- Design and development of source code
- Database design and development
- GUI design
- Code review

Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS
- Frameworks: Yii, PRADO, Zend Framework, jQuery
- Databases: MySQL

2007 - 2009, Software Developer

Intetics Co <http://intetics.com/>

Development of many projects for outsourcing company using following technologies

Primary Responsibilities:

- Code development

- Database development

Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS

- Frameworks: jQuery

- Databases: MySQL

2005 - 2006, Junior Software Developer

Letwork <http://www.letwork.com/>

Development of many projects for outsourcing company using following technologies

Primary Responsibilities:

- Code development

- Database development

Used technologies and tools:

- Platforms: PHP, Javascript, HTML, CSS

- Databases: MySQL
